

Master the front-end with finesse

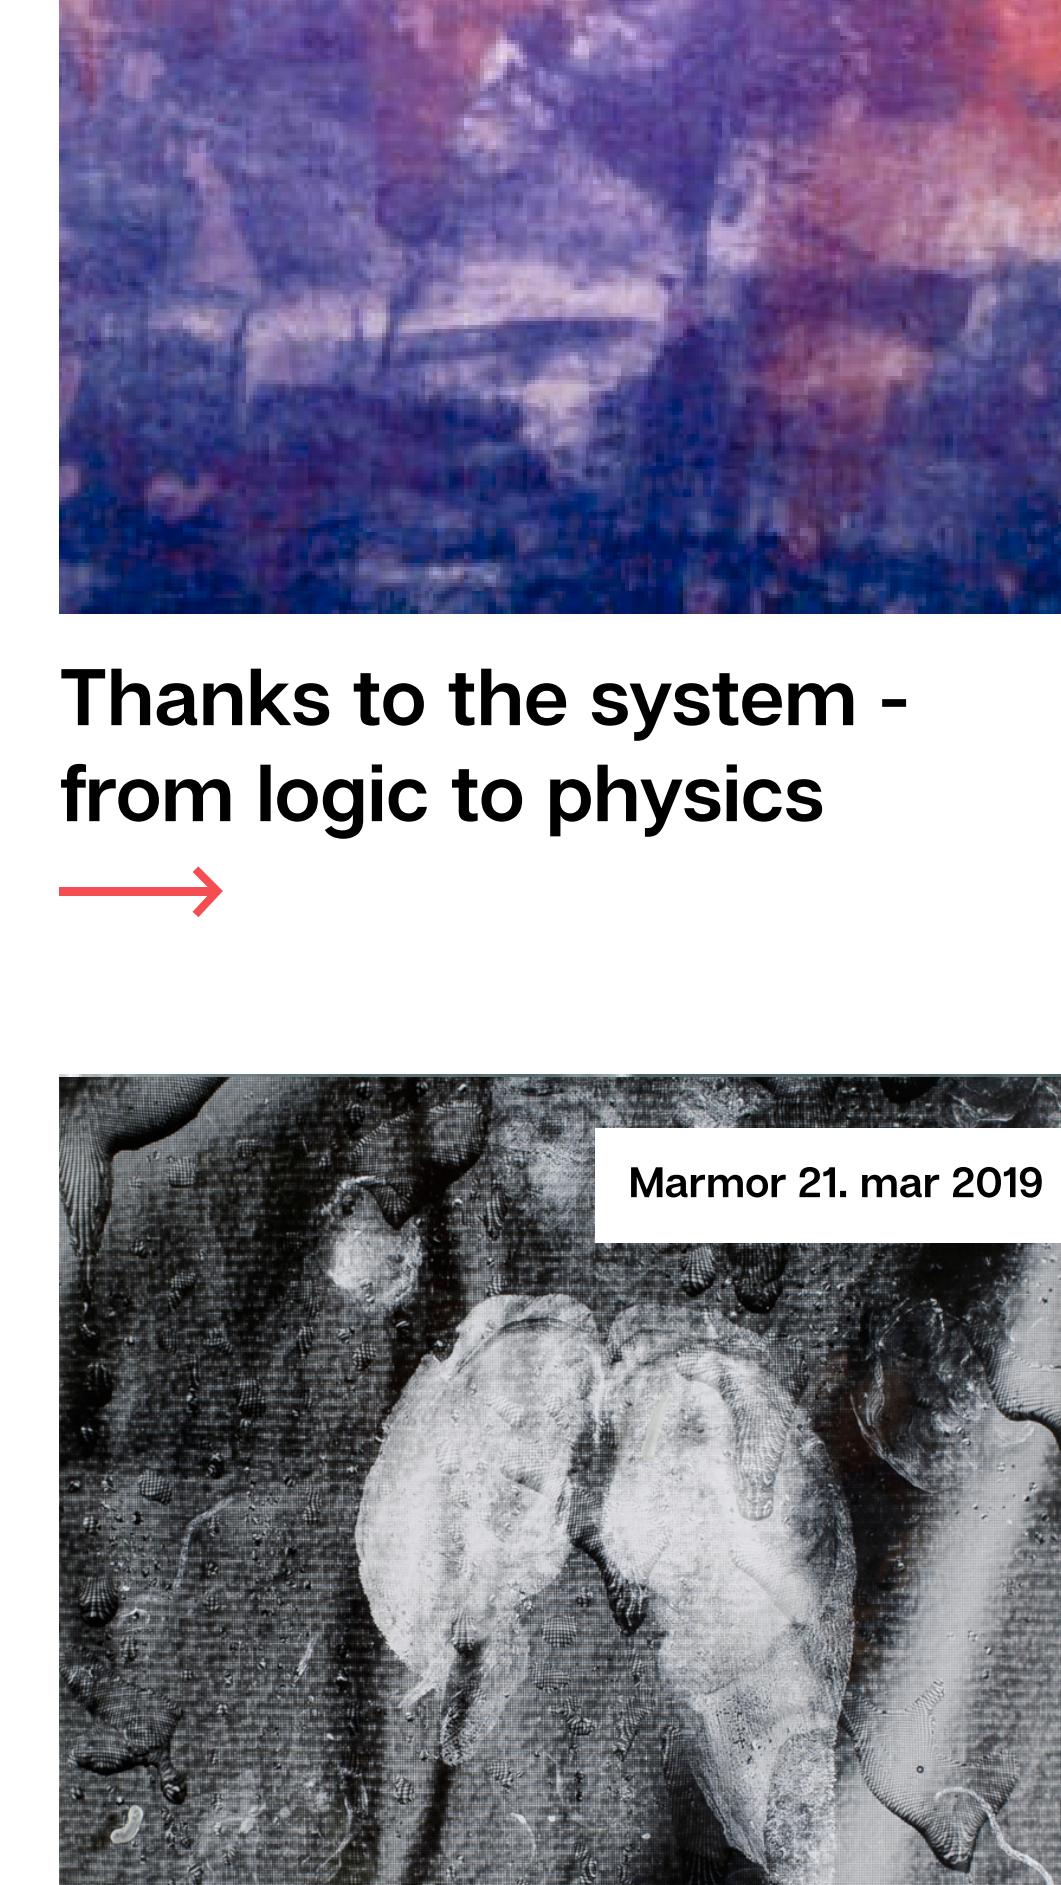

The assignment is supposed to be executed as simple as possible. Code the template in HTML/CSS and try to avoid 3. party frameworks as much as possible. Creating the page with React components will grant extra megamate bonus points.

Jams Bonham
I Imagined that Things
Were Speaking

Mikkel Rommelhoff
Mounting parts in metal
and wood for glass objects

Thanks to the system -
from logic to physics

Philio Rosing
Somthing different

André Kallehauge
Yellow forever and some
lines too

Beware when you go to
Mars for traveling

Your chance

**GET ON THE SKILL
TRAIN NOW** →

The assignment must be delivered as a pull request to the assignment repository and we appreciate running commits so we can see how you go from our small layout to a final awesome product.

Pil Damgaard, 2018

This section is actually a little extra that can be added if you feel confident while working and the time aint sprinting.

#EXTRA

Pil Damgaard
Red Arrows

We use tools like NPM/Gulp/Webpack to preprocess files and PostCSS for some mean, lean, killing machine code and React JS is taking over WordPress one step at a time.

PULL REQUEST

Don't be shy to commit
